Consists of a guide for prospective emigrants from Switzerland to America (Köpfler, 1849) and a history of early Highland (Eggen, 1888). The latter includes previously expurgated material. Synthesizing an explosion of recent research, this book presents dramatic advances in understanding and treating autism spectrum disorder (ASD) in very young children. Leading authorities describe the innovative tools and methods that are enabling clinicians to more effectively identify 0- to 5-year-olds with the disorder and those at risk for related problems. Chapters discuss the early core symptoms and co-occurring characteristics of ASD, the best diagnostic instruments, and lessons learned from large-scale screening and surveillance, including sibling studies. The book reviews evidence-based interventions and explores practical issues in treatment of young children and their families. In 1585, at the height of Jesuit missionary activity in Japan, which was begun by Francis Xavier in 1549, Luis Frois, a long-time missionary in Japan, drafted the earliest systematic comparison of Western and Japanese cultures. This book constitutes the first critical English-language edition of the 1585 work, the original of which was discovered in the Royal Academy of History in Madrid after the Second World War. The book provides a translation of the text, which is not a continuous narrative, but rather more than 600 distichs or brief couplets on subjects such as gender, child rearing, religion, medicine, eating, horses, writing, ships and seafaring, architecture, and music and drama. In addition, the book includes a substantive introduction and other editorial material to explain the background and also to make comparisons with present-day Japanese life. Overall, the book represents an important primary source for understanding a particularly challenging period of history and its connection to contemporary Europe and Japan. Reading Hume on Human Understanding is a companion to the study of one of the great works of

Western philosophy. David Hume's *Enquiry concerning Human Understanding* (1748) has long been recognized as one of the best 'classics' for introducing students to the subject; these essays, most of them specially written for this volume, show how much more than this it is. The aims of the volume are: to provide a general overview of the *Enquiry*, especially for those approaching it for the first time; to set it in the context of Hume's philosophical work as a whole and establish its importance in that context; to elucidate, analyse, and assess the philosophy of the *Enquiry*, and clarify its interpretation; and to discuss recent developments in Hume scholarship that are relevant to the *Enquiry*. The eminent contributors to this volume cover a broad range of topics: meaning, induction, scepticism, belief, personal identity, causation, freedom, miracles, probability, and religious belief. These topics remain at the centre of philosophical debate today, and Hume's treatment of them in the *Enquiry* continues to demand attention and attract controversy.

History of Egypt told in a series of letters to "my dear boys." *Reproduction of the original: Zoological Illustrations, or Original Figures and Descriptions. Volume II*, by William Swainson This book addresses cult and religion in the city of Corinth from the 4th to 7th centuries of our era. The work incorporates and synthesizes all available evidence, literary, archaeological and other. The interaction and conflict between Christian and non-Christian activity is placed into its urban context and seen as simultaneously existing and overlapping cultural activity. Late antique religion is defined as cult-based rather than doctrinally-based, and thus this volume focuses not on what people believed, but rather what they did. An emphasis on cult activity reveals a variety of types of interaction between groups, ranging from confrontational events at dilapidated polytheist cult sites, to full polysemous and shared cult activity at the so-called "Fountain of the Lamps." Non-Christian traditions are shown to have been recognized and viable through the sixth century. The tentative conclusion is drawn that a clear definition of "pagan" and "Christian" begins at an urban level with the Christian re-monumentalization of Corinth with basilicas. The disappearance of "pagan" cult is best attributed to the development of a new city socially and physically based in Christianity, rather than any purely "religious" development. *Reproduction of the original: Zoological Illustrations, or Original Figures and Descriptions. Volume I*, by William Swainson This book provides a philosophical, socio-political and theoretical understanding of the notion of *Becoming* in the context of the related concepts, and in contemplation of the notion of *Being*. Deriving from different traditions from various countries, these concepts act as windows on contemporary early years settings and communities around the world where adults map out infant *becomings*. This book is a valuable resource for early childhood educators, students, professionals, researchers, and policy makers around the globe who seek to understand the locatedness of infant *becomings* in space and time. This thorough commentary presents a coherent reading of 1 Corinthians, taking full account of its Old Testament and Jewish roots and demonstrating Paul's primary concern for the unity and purity of the church and the glory of God. Roy Ciampa and Brian Rosner's well-informed, careful exegesis touches on an astonishingly wide swath of important yet sensitive issues, reinforcing the letter's ongoing theological and pastoral significance. -

Publisher. "This annotated and illustrated compendium focuses on the 76 mineral species first described from Greenland over the interval 1799 (cryolite) to 2005 [qaqarssukite-(Ce)]." BOOK JACKET. A clearly written presentation of the structure and function of cells in plants, microbes, and animals. Discusses current tools and techniques of cell biology as well as major experiments that led to our present understanding of the field. Topics include the chemical composition, microscopic structure, and arrangement of cell organelles; basic chemical and biochemical reactions that occur in these parts; the energetics of cell reactions; and biomechanical and photochemical reactions. This edition is updated with the latest developments, such as research on ATP bonding during muscle contraction and the latest information on RNA transcription. Extensive, imaginative illustrations will enhance students' comprehension of the concepts explored. This work makes this translation of *The First Description of Cincinnati and Other Ohio Settlements* available for the first time. Johann Heckewelder recorded this description in 1792-93 as he traveled down the Ohio River, and then published this report in 1797 in Germany. H. A. Rattermann discovered the work a century ago, translated the work, but never published it. Almost a century after Rattermann's work with the manuscript, Tolzmann "rediscovered" the work in the Rattermann Collection of German-American Manuscripts in the Illinois Historical Survey, University of Illinois-Urbana. This work is the edited version of Rattermann's translation and introduction. It provides a vivid description of the early settlement of Cincinnati and the mode of life, manners, and characteristics of the early pioneers. In 1585, at the height of Jesuit missionary activity in Japan, which was begun by Francis Xavier in 1549, Luis Frois, a long-time missionary in Japan, drafted the earliest systematic comparison of Western and Japanese cultures. The plethora of commentary from highly respected voices in a broad cross-section of academic disciplines, which V. S. Naipaul's death on 11 August 2018 elicited, ranged so widely, both cognitively and emotionally, that if a student of literature, unfamiliar with the Naipaulian era, read it all, they would have failed to make sense of the divergences. Allegations included that he 'was a cruel man', 'a scarred man', 'the darkest dungeons of colonialism incarnate: self-punishing, self-loathing, world-loathing, full of nastiness and fury', 'a ventriloquist for the nastiest cliches European colonialism had devised to rule the world with arrogance and confidence' and so on. On the other hand, writers referred to Naipaul as a 'brilliant writer's writer', one 'who holds a mirror of imagination unto society to capture a certain view of reality'

and one who 'has turned the genre of the travelogue into an art form'. Debates aside, many of us appreciate the value of Naipaul's writing to the deepest possible comprehension of the imperial impulse and the myriad reasons it manifested as colonialism. The First Naipaul World Epics is the first in a series of critical collections that aim to demonstrate this value. At the same time, the series seeks to help the new student through the quagmire of divergent opinions his personality and writing have generated. More of a contemporary description than the title implies, this work includes a physical description of school house including floorplans
